1. Created a **Windows 2019 server** on Azure (called AD)

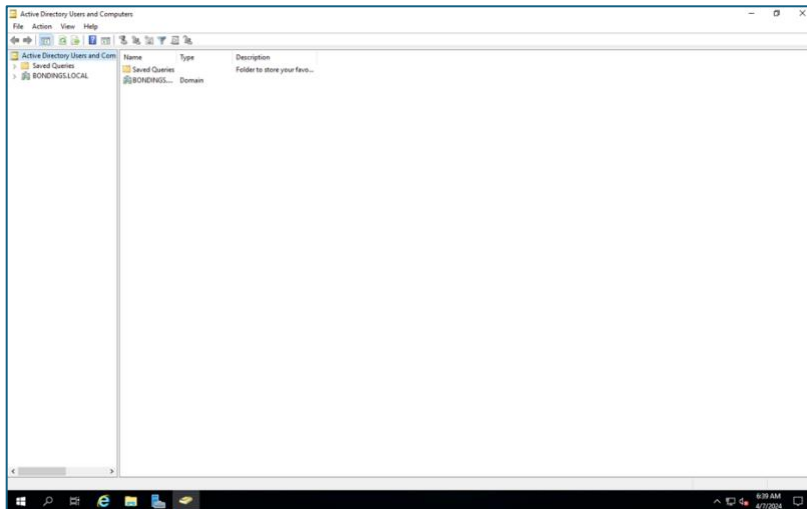

2. Added **roles and features**, and promoted **AD-DS Server to Domain Controller** (**BONDINGS.LOCAL**)

3. Created a **New User (ADMIN)** on **Entra ID** with a **Global Administrator** role.

4. Downloaded, Installed, and Configured **Microsoft Entra Connect** on **On-prem AD** Machine

5. Created a **TEST USER** and tested the **Synchronization**. *SUCCESSFUL*
